

Final seminar of investigators of projects of Student Grant Agency of FS USB (SGA) in 2018

Monday Dec 10, 4 p.m., lecture hall C1

student	study program	supervisit	title
Demková Miriam	Experimentální biologie	Magda Zrzavá	Analysis of W chromosome in <i>Lomaspilis marginata</i> (Geometridae)
Jandová Linda	Klinická biologie	Dagmar Bystřická	Potential association of TaqIA polymorphism in the gene DRD2 for dopamine receptor D2 with human behaviour
Böttinger Katharina	Biological Chemistry	Dmitry Loginov	Proteomic profiling of Ixodes ricinus tick cell line IRE19 and its response to TBEV infection
Hagleitner Nora	Biological Chemistry	Ryan Rego	Identification of transposon mutants in the European Lyme disease pathogen <i>Borrelia afzelii</i> and determination of their plasmid profiles and infectivity in mice
Hain Lisa	Biological Chemistry	Ryan Rego	Studying the dynamics of acquisition and transmission of <i>Borrelia duttonii</i> by the soft tick <i>Ornithodoros moubata</i> in mice
Stanzl Helmut	Biological Chemistry	Zdeněk Paris	RNA metabolism of bacterial endosymbionts in the mealybug <i>Planococcus citri</i>
Lhotská Zuzana	Parazitologie	Kateřina Jirků-Pomajbíková	Study of <i>Blastocystis</i> in Human Microbiome
Wolfová Stanislava	Biologie	Jan Štefka	Biogeography and population diversity in a host-parasite system: ectoparasites of Galapagos doves
Kadlec Jan	Zoologie - specializace Entomologie	Lukáš Čížek	The impact of landscape changes on location of capricorn beetle (<i>Cerambyx cerdo</i>)
Bendová Edita	Biologie	Jarmila Krásová	Genetic diversity of African dormice (genus <i>Graphiurus</i>)
Bodláková Karolina	Biologie	Jarmila Krásová	Genetic diversity of genus <i>Elephantulus</i> in Eastern Africa

All students and researchers are invited, particularly SGA 2019 project applicants
