

Statute of the Ethics Committee Established on 21.6.2022 for Research with Human Biological Material

Employees of the Faculty of Science of the University of South Bohemia in České Budějovice (hereinafter referred to as EFSci USB) are obliged to observe the following ethical rules when working with human biological material. The Ethics Committee is to ensure that these principles and rules are observed:

EFSci USB are to be familiar with the laws and binding regulations that are valid for the area in which they work and that are determined for the work they perform in the given area. EFSci USB are obliged to comply with the laws and regulations.

EFSci USB are to be independent and responsible in their professional decisions at all times.

EFSci USB are to carry out those diagnostic and methodological procedures which correspond to the current state of science and which are practically available and which they considers most appropriate.

EFSci USB are not to misuse the collection of tissues and other biological samples for commercial purposes.

EFSci USB are obliged to strictly maintain the confidentiality of the material obtained, unless otherwise specified in writing by the sample provider.

EFSci USB are to maintain proper and complete documentation, in writing or otherwise, when obtaining and experimenting with specimens.

EFSci USB are to treat the biological sample provider with fairness, understanding, and patience.

EFSci USB are to inform the biological sample provider or his/her legal representative in a responsible and understandable manner of the nature of the intended diagnostic and methodological procedures and of other important circumstances that may arise during the collection of samples.

EFSci USB are not to abuse the trust of the biological sample provider.

EFSci USB are to protect the information of those who have provided samples, consider the information to be confidential, and be aware of their obligation to maintain the confidentiality of facts learned in the course of their profession.

In obtaining and processing samples of biological material, EFSci USB are to respect the life values of citizens, their habits, spiritual needs, and religious beliefs, and strive to create conditions that take into account the individual needs of individuals.

When obtaining a biological sample, EFSci USB are to take care to ensure, as far as possible, the privacy of the provider of the biological sample.
